CAREER OBJECTIVE

Ambitious software developer specializing in the **MERN stack**, eager to contribute to innovative projects within technology industry. I am a **Computer Science student at Al-Hashemite University**, with hands-on experience gained through my **training at Orange Coding Academy**, where I worked on several projects. My core skills include **software development, data mining, and knowledge management**, with practical expertise in **JavaScript, Node.js, React.js, C++, and Java**, demonstrated through both academic and training projects. I excel in **problem-solving and analytical thinking**, with a strong understanding of standardization policies and procedures. Additionally, my **interpersonal and communication skills** have been refined through effective teamwork and leadership roles in various projects. I am seeking a **challenging full-stack development role** where I can leverage my technical expertise, problem-solving abilities, and teamwork skills.

Technical Skills

Front-End Technologies: HTML, CSS (Tailwind, Bootstrap), Java Script, React JS, Next JS, Redux,Figma.

Back-End Technologies: Node JS, Express JS, PHP.

Database: MySQL, Mongo DB, PostgreSQL, Firebase, Sequelize

Operating Systems: Windows, Linux.

Software Development Practices(SDLC): Scrum, Agile.

Tools: MS Office (Word, Excel, PowerPoint), Git , Github ,Trello, Postman ,Stream ,xampp.

CMS: Odoo.

Soft Skills

Software Development	Critical Thinking	Time Management
Process Evaluation	Problem-Solving Ability	Problem-Solving Ability
Performance Review	Project Management	Effective Communication
Data Analytics Skills	Creativity and Innovation	Attention to Detail
Requirement Analysis	Customer-Centric Approach	Team Collaboration

Experience

Coding Academy by Orange
Full Stack Web Development Trainee

Dec 2024 - Present

Work Experiences:

- Developing Full-stack applications using the MERN stack (MongoDB, Express.js, React, Node.js) alongside HTML, CSS, and JavaScript to build dynamic and scalable web solutions.
- Building responsive and visually appealing Front-end interfaces with React, Redux, Tailwind, and Bootstrap, ensuring a seamless user experience.
- Designing and consuming RESTful APIs with Node.js, Express.js, and Sequelize, optimizing Backend performance and database interactions.
- Working with multiple Databases, including MongoDB, PostgreSQL, and Firebase, to efficiently manage and store application data.
- Delivered 10 full-stack web projects, applying skills to real-world scenarios. Developed scalable, maintainable, and high-performing applications.

Projects

1) Global Crime News Platform [[github](#)]

Description: A dynamic platform focused on global crime coverage, real-time updates, and raising awareness through reliable and accurate information. The platform features crime news updates, exclusive content for subscribers, secure journalist submissions, and an admin control system for content moderation. The project also includes an advanced analytics dashboard for managing statistics and site content.

Built using MongoDB for a scalable and flexible backend.

2) Jood – Revolutionizing Charity with Technology [[github](#)]

Description: An innovative platform that seamlessly connects donors with those in need, ensuring secure and transparent donations while empowering individuals and

organizations to create real social impact. Built using **Node.js**, **Express**, **PostgreSQL**, and **Sequelize** for a robust and scalable backend.

3) **Sport Booking Platform** [\[github\]](#)

Description: Sport is an innovative online platform that simplifies the process of booking sports fields. Whether you're a player looking for a quick match or a field owner managing reservations, our platform provides a seamless experience. Users can browse available fields, book in real-time, and manage their reservations effortlessly. Built using: **React.js** and **Redux** for a fast, dynamic, and state-managed user experience!

4) **ManageMate – Smart Task Management** [\[github\]](#)

Description: A well-designed online platform that enables individuals and teams to efficiently organize, track, and manage their tasks, providing a fast and seamless user experience with React.js.

Education

Al-Hashemite University, Jordan 2025
Bachelor's in Computer Science (Very good)

Conferences and Training Attended:

- Participated in the **Epicode** problem-solving competition, where I provided creative solutions to coding challenges and gained experience in analytical thinking and problem-solving. [\[link\]](#)

Volunteer Experience

I have actively participated in various volunteer initiatives, including being a dedicated member of the **Al-Etihad Team** at **Hashemite University**. Through this role, I contributed to multiple community-driven projects, such as providing educational resources to students, organizing workshops, and coordinating volunteer-driven events to support academic and professional development. These experiences have strengthened my teamwork, leadership, and organizational skills while reinforcing my passion for community service and knowledge-sharing.

Courses and Certificates

- **Full Stack Development** (I have been certified as a Stack Soft Academy Certified Trainee in partnership with Contemporary Cryptography Solutions, after successfully completing 90 hours of premium training.) ([Link](#))
